Los Alamitos Medical Center | Los Alamitos, CA

Davis-Monthan Air Force Base | Tucson, AZ

St. Mary's Academy | Inglewood, CA

Naval Air Station | Lemoore, CA

Alaska Wildlife Conservation Center | Girdwood, AK

For institutional facilities such as schools or universities, hospitals or government sites, tensioned fabric structures can be used as walkway or entrance canopies, weather coverage at a corporate courtyard complex or even an accent feature for a museum or convention center. Fabric membranes have many benefits including diffused daylighting, low maintenance, long-term durability, lightweight and flexible nature, cost efficiencies and a variety of fabric selections for specific performance criteria.

Architects and designers create their ideas keeping students, office and government workers, and hospital visitors in mind, knowing the unique look of a tensile membrane structure will adapt to any design expectations. Providing nearly unlimited design options with distinctive aesthetics, Tension Structures by Eide Industries can provide turn-key services for your next custom design-build project.

About Us

Proudly manufacturing in the United States since 1938, Tension Structures by Eide are fabricated in our 41,000 square foot Southern California facility. Eide Industries combines proven industry standards, technical expertise, professional turn-key services, state-of-the-art equipment, and high performance materials to manufacture customized products with uncompromising quality and engineered design-build details.

We specialize in design, manufacturing and installation of structurally complex and creatively challenging commercial, government and prototype design projects regardless of job size, scope of work or administrative demands. Eide welcomes any opportunity to partner with projects that require compliance with FAR, DIR and OATELS, Prevailing Wages, Apprenticeship Programs, and Union Labor Agreements.
